Pin the under-wing body to the body front; tack in place. Sew the tail feather in place with a running stitch down the center. Position the wing in place and add decorative stitching with white floss.

Tack on a circle of black felt with a white French knot for the eye. Add the decorative stitching around the eye. Tack the beak into place.

Pin the completed body front and body back. Sew the two body pieces together using a blanket stitch. Pause to stuff with fiberfill before completing the blanket stitch.

Have fun!
