Follow these instructions to create two mirror images of the bird - a front and back that you will later sew together for a double-sided ornament.

Tack the beak into place with matching floss. With one strand of brown floss, create the mouth with a running stitch. Use three black French knots for the eye.

Position the wing. Add the decorative stitching to the wing using two strands of white embroidery floss.

Tack the legs on the wrong side of one of the body pieces.

Pin the body front and back together and sew around the edges with a blanket stitch using white floss, pausing to stuff the ornament with fiberfill before completing.

Have Fun!

Susan
