Begin by positioning the nose on the front of the dog; tack with black thread. Position the eyes and carefully add a running stitch in black around the outside of the eye. Create the eye pupil with a French knot in black, or with a fine-tip Sharpie.

Using two strands of a brown floss darker than your felt, add the decorative stitching that defines the body parts. Add the tiny stitches that define the feet using one strand of black floss.

Position the tail to the outside of the back body piece; tack.

Pin the body front and back together and sew the edges with a blanket stitch using two strands of the same color floss used for the detailing. Before completing the blanket stitching, pause to lightly stuff with fiberfill.

Have Fun!
