Begin by tacking the front and back legs to the body front and then on the mirror side of the body back with black floss. Position the head and pin. Tack the ears into place with a running stitch around the edges with black floss. Tack the eyes into place and then finish off by sewing a black glass seed bead in the center of each eye. Tack the nose into place.

Add decorative stitching as outlined on the pattern for the nose and tail using a light gray floss. Use black floss to sew the mouth.

Sew the body pieces together with a blanket stitch using two strands of floss. I used black floss when sewing around the black parts of the Panda and white floss when sewing around the white parts. Before finishing the blanket stitching, lightly stuff with fiberfill.

Have Fun!
