

# Downeast Thunder Nubian Goat

Copyright 2019 Downeast Thunder Farm

Create your goat with any combination of colors. Use two strands of matching colored floss for sewing the bodies together. Create two mirror images of the goat for a two-sided ornament.

- With off-white embroidery floss, add the belly with a running stitch around the edges.
- Position the ear and tack with a running stitch along the top edge.
- With black floss, add the decorative running stitches for the legs and mouth. Tack the hooves in place. For the last rear hoof, trim the hoof piece down to fit.
- Create the outline of the eye with black floss. In the center, sew a French knot with two strands of green or gold floss.
- Create the nose with a satin stitch using dark gray or black floss.
- Position the hooves and tack.
- Position the tail on the backside of one of the body pieces and lightly tack.
- Pin the two body pieces together. Using two strands of brown floss, sew the two body pieces together with a blanket stitch. Before you finish the blanket stitch, pause to lightly stuff the body with fiberfill.

Have fun!
