

Downeast Thunder Farm Carolina Wren

Create two mirror images of this bird for a double-sided ornament.

- Position the body on the back and tack with brown floss.
- Add the neck and tack with white floss.
- Position the beak and tack with black floss.
- Position the brows, so they slightly overlap the beak and tack with white floss.
- Position the eye and tack with an "x" and finish off with a seed bead if desired.
- Position the wing and tack around the edges with a brown running or blanket stitch. Add the decorative running stitches to the wing and tail with brown floss.
- Sew the lazy daisy stitches on the wing and body in alternating black and white stitches.
- Sew the two body pieces together with a brown blanket stitch, pausing about 1.5 inches before finishing and lightly stuff with fiberfill before finishing.

Have fun!

Susan
