

Downeast Thunder Farm Mourning Cloak

Copyright 2020 Downeast Thunder Farm

This is a one-sided ornament. Consider adding a magnet to the back. If you want a double-sided ornament, repeat the yellow wing decoration on the back.

- Position wing decoration on wings and tack with a short running stitch using one strand of white floss.
- Using six strands of blue floss, create blue spots with a few side-by-side stitches.
- Position the body and tack with a blanket stitch around the edges using one strand of dark gray floss. Add black seed beads for eyes. Add the body decorative stitching.
- Using two strands of dark gray floss, add the diagonal running stitches to the wing as illustrated.
- On the back, tack a "V" of wire for the antennae. Tack another piece of wire from wing to wing to allow you to shape the butterfly.
- Pin the body pieces together and sew with a blanket stitch using two strands of gray floss.

Have fun!

Susan
