

# Downeast Thunder Farm Little Brown Bat

Copyright 2022 Downeast Thunder Farm

- On the body front, tack the ears with matching floss. Add the ear decoration using a lighter brown/beige floss.
- Create the eyes with black seed beads or black French knots.
- Create the nose with two brown French knots. Add the mouth with a couple of black stitches.
- Pin the two body pieces together and sew with a blanket stitch. Pause before finishing and lightly stuff with fiberfill.
- Add the decorative stitching on both wings according to the pattern.
- Position the body on the wing. Sew the two together by running your needle and thread through both the wing and body back.
- Optional: Tack a length of wire to the back of one wing from edge to edge to allow you to shape the bat. For the legs, tack a length of wire in the shape of a "V" to the back of one wing.
- Pin the two wings together. Using two strands of matching brown floss, sew the two body pieces together with a blanket stitch.

Have fun!
