Position and pin into place the head over the one body piece. Sew on the eye. Pin the beak into place and sew the decorative stitching.

Position the tail feather on the top body; pin. Place the under wing on top of the tail feather; pin. Layer the upper wing in place; pin. Sew on the wing decorative stitching – this will hold the feather and wing pieces in place. Sew on the belly decorative stitching.

Pin the completed body front and body back together. Use a blanket stitch to sew the two pieces together. Pause to stuff with fiberfill before finishing.

Note: For all of the stitching I used three strands of black embroidery floss.

Have fun!
