Tack the black cap and beak onto the body front. I opted to sew the black cap on instead of using the pattern piece. Leave a strand of thread hanging at the back of the cap for the cap feather.

Cut a tiny circle or orange for the eye. Tack it into place with a French knot.

Pin the wing onto the body front and sew on the decorative stitches.

Pin the completed body front and body back together. Tuck a 2.5" piece of pipe cleaner in the neck to provide the neck more structure. For the legs, bend a piece of pipe cleaner (or wire) in half and pin into place.

Use a blanket stitch to sew the body front and back together. Pause to stuff with fiberfill before finishing.

Have fun!
