Pin the cape into place on the body top. Cut a circle of black felt for the eye (I use a paper hole punch); tack into place. Pin the wing into place and add the decorative stitching with two strands of black embroidery floss.

Pin the completed body front and body back together. Use a blanket stitch to sew the two pieces together with three strands of black embroidery floss. Pause to stuff with fiberfill before finishing.

Tack the beak into place with one thread of embroidery floss.

If you like, create the feet with a bit of folded wire tucked between the two body pieces.

Have fun!
