Position the wing and under wing on the body; pin. Sew the decorative stitching on the wing. Place the head on the body front overlaying the wings; pin. Sew on a circle of black felt for the eye and add the decorative stitching onto the shoulder area. Place the beak overlapping the blue head and attach with a running stitch along the length of the beak.

Sew the completed front to the body back using a blanket stitch. Pause to stuff with fiberfill before completing. I used a bit of wire folded in half and then twisted for the legs.
