Begin by positioning the tail feather on the wrong side of the body front (it will be sandwiched between the two body pieces). Tack the tail into place. Position the white bottom and tack into place. Position the wing, pin and add the decorative stitching.

Position the head onto the body front; pin. Position the white face overlapping the head. Sew the face into place with a running stitch using white embroidery floss. Tack the eye in place. I opted to use a brown bead for the eye. Position the beak; tack into place with a couple of black stitches for the nostrils.

Pin the body front and back together. Using a blanket stitch with three strands of black floss, sew around the edges, pausing to stuff with fiberfill before completing.

Have fun!
