Make two mirror images of the body to create a double-sided bird. Position the upper wing and tack by adding the decorative stitching using two strands of floss in a pink paler than the color of your felt. Position the lower wing and tack with the decorative stitching.

Position the face and tack with a black French knot for the eye. Surround that French knot with a ring of yellow stitches. Position the beak and tack, adding the black decorative stitches on the face above the beak.

Fashion a pair of legs with a piece of wire and tack to wrong side of the body. Sew the body pieces together with a blanket stitch using two strands of a matching color floss. Before you finish sewing the neck area, tuck a piece of wire in the neck to give it structure.

Have Fun!
