Create two mirror images of this pattern for a double-sided ornament. Position the tail and tack. Layer on the wing and add the decorative stitching using two strands of brown floss. Tack the mid-wing into place and then position the head; add the decorative stitching. Tack the beak in place with one strand of black floss. Cut an oval of black felt for the eye and tack with a black seed bead. Add the fine decorative stitches around the eyes with one strand of brown floss. Add the "feather shapes" with a lazy daisy stitch using three stands of brown floss.

If desired, create legs from wire and tack to the wrong side of one body piece. -

Sew the body pieces together with a blanket stitch using two strands of brown floss. Before finishing the blanket stitching, lightly stuff with fiberfill.

Have Fun!
